Project Title	Funding	Institution	
Wiring the brain: From genetic to neuronal networks	\$13,000	University of North Carolina at Chapel Hill	
Visuospatial processing in adults and children with autism	\$30,000	Carnegie Mellon University	
Visual perspective-taking and the acquisition of American Sign Language by deaf children with autism	\$28,000	University of Texas at Austin	
Using genetically modified mice to explore the neuronal network involved in social recognition	\$60,000	Haifa University	
Upgrade to multiuser 3T magnetic resonance imager	\$500,000	University of Kentucky	
Understanding perception and action in autism	\$32,000	Kennedy Krieger Institute	
Towards an endophenotype for amygdala dysfunction	\$384,145	California Institute of Technology	
Time perception and timed performance in autism	\$89,871	Kennedy Krieger Institute	
The role of the amygdala in autism	\$152,144	University of California, Davis	
The role of Fox-1 in neurodevelopment and autistic spectrum disorder	\$139,471	University of California, Los Angeles	
The neural substrates of repetitive behaviors in autism	\$54,436	Boston University Medical Campus	
The neural correlates of transient and sustained executive control in children with autism spectrum disorder	\$60,000	University of Missouri	
The neural basis of social cognition	\$325,651	Indiana University	
The mirror neuron system in the monkey and its role in action understanding	\$184,470	Massachusetts General Hospital	
The microstructural basis of abnormal connectivity in autism	\$348,980	University of Utah	
The fusiform and amygdala in the pathobiology of autism	\$311,951	Children's Hospital of Philadelphia	
The effects of Npas4 and Sema4D on inhibitory synapse formation	\$127,500	Children's Hospital Boston	
The development of object representation in infancy	\$248,095	Regents of University of California	
The development and redevelopment of lexical and sublexical representations	\$380,273	The Research Foundation of the State University of New York	
The cognitive neuroscience of autism spectrum disorders	\$1,335,493	National Institutes of Health (NIH)	
Testing the effects of cortical disconnection in non-human primates	\$150,000	The Salk Institute for Biological Studies	
Testing neurological models of autism	\$315,526	California Institute of Technology	
Taste, smell, and feeding behavior in autism: A quantitative traits study (supplement)	\$151,884	University of Rochester	
Taste, smell, and feeding behavior in autism: A quantitative traits study	\$592,498	University of Rochester	
Structural brain differences between autistic and typically-developing siblings	\$12,030	Stanford University	
Stereological analyses of neuron numbers in frontal cortex from age 3 years to adulthood in autism	\$0	University of California, San Diego	
Social behavior deficits in autism: Role of amygdala	\$93,500	State University of New York Upstate Medical Center	
Social and affective components of communication	\$152,186	The Salk Institute for Biological Studies	
Slick and slack heteromers in neuronal excitability	\$53,354	Yale University	
Sensory processing and integration in autism	\$593,677	City College of New York	
Roles of Wnt signaling/scaffolding molecules in autism	\$28,000	University of California, San Francisco	

Role of man in synapse stability Role of man in synapse stability Role of many synapse stability Role of sutters associately single synapse stability Role of sutters associately synapse synapse stability Role of sutters associated of gene expression in cells and networks in FI and ACC in S64-301 suttern Role-Seq studies of gene expression in cells and networks in FI and ACC in S64-301 suttern Role-Seq studies of gene expression in cells and networks in FI and ACC in S64-301 suttern Role-Seq studies of gene expression in cells and networks in FI and ACC in S64-301 suttern Role-Seq studies of gene expression in cells and networks in FI and ACC in S64-301 suttern Role-Seq studies of gene expression in solitors with autism (supplement) Pagestation of gene expression in the brain Role-Seq studies of gene expression in the studies of the studi	Project Title	Funding	Institution

fMRI studies of neural dysfunction in autistic toddlers	\$614,468	University of California, San Diego	
fMRI studies of cerebellar functioning in autism	\$46,000	University of Illinois at Chicago	
Evaluation of sleep disturbance in children with ASD	\$27,456	Center for Autism and Related Disorders (CARD)	
Engrailed genes and cerebellum morphology, spatial gene expression and circuitry	\$474,750	Memorial Sloan-Kettering Cancer Center	
Engrailed and the control of synaptic circuitry in Drosophila	\$112,500	University of Puerto Rico Medical Sciences Campus	
Electrical measures of functional cortical connectivity in autism	\$60,000	University of Washington	
Distinct function of the neuroligin 3 postsynaptic adhesion complex	\$37,784	Columbia University	
Development of the functional neural systems for face expertise	\$524,017	University of California, San Diego	
Development of brain connectivity in autism	\$312,916	New York School of Medicine	
Description and assessment of sensory abnormalities in ASD	\$18,968	Center for Autism and Related Disorders (CARD)	

Project Title	Funding	Institution	
Deriving neuroprogenitor cells from peripheral blood of individuals with autism	\$46,597	University of Utah	
Dendritic organization within the cerebral cortex in autism	\$144,822	The Open University	
Cortical mechanisms underlying visual motion processing impairments in autism	\$60,000	Harvard Medical School/McLean Hospital	
Cortical complexity in children with autism, unaffected siblings, and controls	\$79,000	Stanford University	
Connectivity of anterior cingulate cortex networks in autism	\$265,044	New York University School of Medicine	
Coherence and temporal dynamics in auditory cortex of children with autism	\$88,292	Massachusetts General Hospital	
Cognitive control in autism	\$146,960	University of California, Davis	
Chemosensory processing in chemical communication	\$287,963	Florida State University	
Characterization of the pathological and biochemical markers that correlate to the clinical features of autism	\$0	Research Foundation for Mental Hygiene, Inc.	
Characterization of the pathological and biochemical markers that correlate to the clinical features of autism	\$0	Research Foundation for Mental Hygiene, Inc.	
Characterization of the pathological and biochemical markers that correlate to the clinical features of autism	\$0	Research Foundation for Mental Hygiene, Inc.	
Characterization of the mirror neuron system in 3-9 month old infants using the BabySQUID imaging system	\$4,748	University of New Mexico	
Cerebellar modulation of frontal cortical function	\$347,643	University of Memphis	
Cerebellar anatomic and functional connectivity in autism spectrum disorders	\$251,419	University of Texas at Austin	
Brain circuitry in simplex autism	\$187,500	Washington University in St. Louis	
Behavioral pilot for an imaging study of social attention deficits in autism	\$205,200	Washington University in St. Louis	
Behavioral and sensory evaluation of auditory discrimination in autism	\$150,220	University of Massachusetts Medical School	
Behavioral and functional neuroimaging investigations of visual perception and cognition in autistics	\$127,168	Université de Montréal	
BDNF secretion and neural precursor migration	\$0	Dana-Farber Cancer Institute	
Autistic endophenotypes and their associations to oxytocin and cholesterol	\$84,055	Mount Sinai School of Medicine	
Autism spectrum disorders and the visual analysis of human motion	\$250,000	Rutgers, The State University of New Jersey	
Atypical late neurodevelopment in autism: A longitudinal MRI and DTI study	\$503,378	University of Utah	
Attentional abnormalities in autism: An electrophysiological study of the basal forebrain and central nucleus of the amygdala	\$60,000	University of California, San Diego	
Are neuronal defects in the cerebral cortex linked to autism?	\$0	Memorial Sloan-Kettering Cancer Center	
Architecture of myelinated axons linking frontal cortical areas	\$54,000	Boston University	
Anterior cingulate and fronto-insular related brain networks in autism	\$194,745	Mount Sinai School of Medicine	
Anatomy of primate amygdaloid complex	\$106,669	University of California, Davis	
Analysis of the small intestinal microbiome of children with autism	\$132,750	Massachusetts General Hospital	

Project Title	Funding	Institution	
Analysis of brain microstructure in autism using novel diffusion MRI approaches	\$59,992	Washington University School of Medicine	
A model-based investigation of face processing in autism	\$12,950	Georgetown University	
A microdevice for immune profiling of children with autism	\$19,000	University of California, Davis	
A combined fMRI-TMS study on the role of the mirror neuron system in social cognition: Moving beyond correlational evidence	\$127,500	University of California, Los Angeles	
ACE Center: The Imaging Core (supplement)	\$54,458	University of California, Los Angeles	
ACE Center: The Imaging Core	\$326,381	University of California, Los Angeles	
ACE Center: Systems connectivity + brain activation: Imaging studies of language + perception (supplement)	\$94,022	University of Pittsburgh	
ACE Center: Systems connectivity + brain activation: Imaging studies of language + perception	\$444,021	University of Pittsburgh	
ACE Center: Neuroimaging studies of connectivity in ASD	\$337,540	Yale University	
ACE Center: Mirror neuron and reward circuitry in autism (supplement)	\$51,364	University of California, Los Angeles	
ACE Center: Mirror neuron and reward circuitry in autism	\$307,838	University of California, Los Angeles	
ACE Center: Imaging the autistic brain before it knows it has autism	\$206,916	University of California, San Diego	
ACE Center: Disturbances of affective contact: Development of brain mechanisms for emotion (supplement)	\$32,703	University of Pittsburgh	
ACE Center: Disturbances of affective contact: Development of brain mechanisms for emotion	\$154,445	University of Pittsburgh	
ACE Center: Diffusion tensor MRI + histopathology of brain microstructure + fiber pathways (supplement)	\$2	University of Pittsburgh	
ACE Center: Diffusion tensor MRI + histopathology of brain microstructure + fiber pathways	\$12	University of Pittsburgh	
ACE Center: Development of categorization, facial knowledge in low & high functioning autism (supplement)	\$81,816	University of Pittsburgh	
ACE Center: Development of categorization, facial knowledge in low & high functioning autism	\$386,379	University of Pittsburgh	
ACE Center: Cognitive affective and neurochemical processes underlying IS in autism	\$377,577	University of Illinois at Chicago
